

A Better Benning 2021

MWR / MACH 2nd Quarter

	What is the Problem?	MWR	MACH	Status
1	<p>Lack of sports for kids on post during COVID.</p> <p>There have been no youth sports on post, even though the surrounding community has managed to have multiple sports seasons safely. (Baseball, hockey, soccer, etc.) Instead of being able to utilize something that is closer to home, where children could be on a team with their peers, they are forced to larger leagues off post. It is more time consuming and cost prohibitive in some cases.</p>	Working: Actively recruiting coaches with a plan to start team sports NLT Fall 2021.	<p>Ongoing: Parents may request a form to be filled out via Secure Messaging with the physician referencing a physical that occurred within the last year as long as everything was normal / reassuring with that physical. If not, the child will likely need to come in for re-evaluation.</p> <p>Current:</p> <ul style="list-style-type: none"> • The first School and Sport Physicals clinic held on June 19 was successful with approximately 130 children seen. The July 10 and 24 dates were also successful with about 110 seen at each. • August 14 School and Sports Physical date is booked full – expecting 150+ patients. • Excellent ICE Comments were received. Many parents highlighted the efficiency of the process. • All dates were being messaged through Facebook, and Kiosk (PAO Action) and should be provided to Base PAO. 	Closed
2	<p>COVID REG AT CDC</p> <p>My husband and I are both essential personnel. My husband is active-duty and I am a medical provider at basic training. My husband is currently deployed. We have all formal paperwork into the CDC about us being dual essential personnel. There is no formal document given to parents about the Covid regulations when it comes to when kids are in or out of the classroom. Example 1: Last week</p>	Closeout: A one page chart was given to all facilities and sent out thru CYMS to parents so they could easily look at the chart for guidance on COVID and Non-COVID diagnosis. The chart was done with input from MACH through our CYS Nurse. All members of management were trained on this information.	Ongoing: The hospital is the consulting component of MWR.	Closed

A Better Benning 2021

MWR / MACH 2nd Quarter

my daughter was sent home for three days stating she had a fever although no fever was ever detected at my home. I used two separate thermometers every hour for five hours. Due to this regulation I had to be removed from work for three full days thus impacting care at OSUT. Second example, my daughter was removed from CDC today due to an "exposure in the classroom". They said she can attend care, but she's not allowed to attend at that school, yet did not provide backup care even though we have the essential personnel paperwork in place. They also called at 1730 and said I could call Parent Central, conveniently this is when Parent Central closes. Again I'm being taken out of the medical field at OSUT which is an essential task for this Army due to no clear policy at the CDC. Or if there is a policy it's certainly not being implemented in a clear and concise way.
